Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 23 October 2008.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Arguments

Applicant's arguments filed 10/23/08 have been fully considered but they are not persuasive.

Applicant has amended claim 1 to assert that the final data is different than the raw data.

Applicant argues that Sasaki fails to teach this limitation.

Examiner argues that Sasaki changes the form of the original raw data because the Min Client (commercial distributor) embeds a user identifier into the data, thus changing the data [0042]. Sasaki also teaches an end user may act as an IsoClient, by receiving and rendering data, or an IsoServer by distributing content to a different user (Iso Client) [0045]

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, is rejected under 35 U.S.C. 102(e) as being anticipated by Sasaki US 2002/0077988.

As per claims 1

Sasaki teaches an IsoClients (licence manager) exchanging data and receiving one or more IsoProgs (keys from said IsoServers (certificate authority) [0041] . Sasaki teaches applying said IsoProgs (encryption key) to one or more collections of RawData (content key) to generate one or more collections of IsoData (content package) [0041]. Sasaki teaches transmitting one or more collections of IsoData to one or more MinClients (commercial distributor) [0041]. Sasaki teaches changing the form of the original raw data because the Min Client (commercial distributor) embeds a user identifier into the data, thus changing the data [0042]. Sasaki teaches applying one or more HeteroProgs (reencrypt) to one or more collections of IsoData to generate one or more collections of Final IsoData (encrypted with user key) [0042]. Sasaki teaches transmitting one or more collections of FinalIsoData to one or more IsoServers (user) [0042]. Sasaki teaches applying one or more InvIsoProgs (user key) to one or more collections of FinalIsoData to generate one or more collections of Final Data where the final data is different than the raw data (content key, content) [0044]. Sasaki teaches transmitting the final data to one or more IsoClients (another user) [0045].

Sasaki does not explicitly teach the source of public private key pairs, but it is well known in the art to obtain key pairs from a trusted certificate authority. The examiner takes official notice as such.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
